

The web&app service for automatic cataloging of photographs

FOTOtouch

How important is photography in your work?

Whatever the answer, we help you do it as quickly and intelligently as possible.

Industrial sector

construction sector

Taking photographs is very often a big commitment for the company. It is essential to optimise resources and maximise the results. Taking the correct photograph, downloading it to the computer, arranging the content correctly so that it can be easily found and used at any time are, today, consequential operations that require time and precision.

FOTOtouch allows you to condense this process into a **unique action** at the time of the survey, **reducing the time**, simplifying and **improving your daily production**.

**Your time is precious,
don't waste it!
FOTOtouch helps you
to optimise time and costs.**

FOTOtouch is the software for companies and professionals in the construction, industrial, real estate and public sectors.

The web&app service for automatic cataloging of photographs.

To whom is FOTOtouch aimed?

FOTOtouch is the solution that optimises the work and processes of **photographic documentation management** for professionals and companies. In particular, it **optimises time and costs** in the process of photographic cataloging of the different processing steps, technical or monitoring interventions and much more!

Industry

Construction companies

Real estate companies

Installation companies

Architects

Project manager

Maintainers

Appraisers

What are the benefits of FOTOtouch?

AUTOMATIC CATALOGING

Already at the shooting stage, photographs are **stored and catalogued** according to predefined logics.

TRACEABILITY

Immediate traceability of the photo shoot and related information.

REPORTING

The system generates **interactive print reports** to share with your team and your customers.

NOTIFICATIONS

Real-time updates keep you informed of all project phases.

MAPS

If useful, by positioning the shot you can define a **precise point of view** on project drawings.

OFFLINE

It is possible to access the software and **work offline**, and then synchronise files once on the network.

COLLABORATIONS

It is possible to **interact with collaborators** and customers by sharing content and information.

All the power of the web and the flexibility of an app, for maximum efficiency

WEB

Connect to the portal, manage photographs and information of your works, projects or those of your collaborators.

Create new activities, check their state of progress, generate photo reports and much more.

All photographs will be centralised, organised, safe and full of information that FOTOtough will manage for you making them immediately available.

APP

Download the app to your smartphone or tablet and start shooting... even without a connection! Log in, select your project and shoot, FOTOtough takes care of the rest.

Quick and easy! While you're photographing, you're already organising your shots and enriching them with the information you want. Take voice notes, enter text notes or draw directly on your shot.

Whenever you want, FOTOtough will synchronise and organise your work on your personal cloud.

How does FOTOtough work? The answer in 3 steps!

1. WEB

Create the order, create tags, choose the logic of organising the shots and, if you want, assign a map.

2. APP

Choose the order, photograph, tag, take notes, draw directly on the image and, if you want, place the shot on the map. When you are done, upload data to the web while you are out of the office.

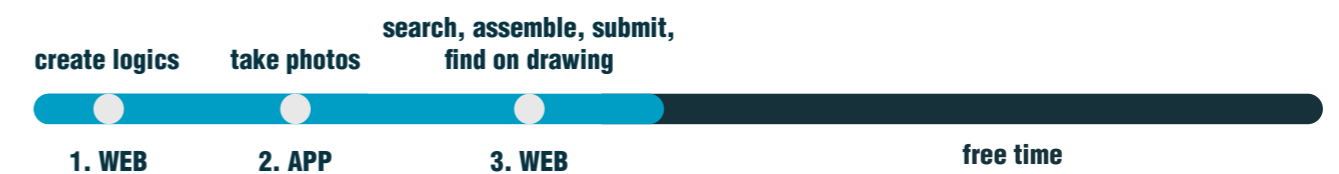

3. WEB

Check the progress of your work with the timeline, easily search your own shots or even those of your colleagues, manage photographs and generate interactive reports.
